

C400 Software and Documentation Package

C400 Software and Documentation Package

The enclosed USB memory stick contains the following:

1. The C400 user manuals and datasheets.
2. PTC DiagnosticG2 program. This allows full control you your device.
3. A copy of the puTTY freeware terminal program to allow you to try the serial ASCII interface.
4. A backup copy of device firmware which is downloadable to the device using PTC Diagnostic host software. This firmware has been pre-installed in your unit.

Please contact FMB Oxford at Sales@fmb-oxford.com for the latest versions of all these files, plus applications notes.
